## DRAWING IN THE ASPECTS

Oppositions and squares are powerful aspects, sometimes negative in effect but often a source of energy and potential.

Trines and sextiles usually denote

harmony, and a state of ease between the

planets concerned: too many can tend to

weaken a personality.

Tire semi-sextile and sesquare are usually minor influences, bur do not underestimate the potency of a semi-square and quincunx, which can be almost as strong as the square if personal planets are involved.

A conjunction is marked only by the closeness of the planets concerned (as with Jupiter and Saturn).
